

# **Snowbirds say 'thank you'**

My husband and I are snowbirds. Last week, he suffered a heart attack and subsequently had open heart surgery. The high quality of care and professionalism shown to my husband and me was astounding. From the staff at Destin Urgent Care and ambulance service, to the Cath Lab, Cardio-Vascular Intensive Care Unit and Progressive Care Unit personnel, nurses and surgeons at Fort Walton Beach Medical Center, we say a heartfelt thank you for everything.

We had also placed a pick-up order with Publix Market at Paradise Keys, which was forgotten due to the circumstances. The Publix event planning department called to remind us of our order and realized our situation. Not only were they understanding, but they also called us two days later to check on my husband's condition!

We are so fortunate to have discovered the Destin-Fort Walton Beach area, with its high quality medical care and customer service!
